ISHITA MISHRA

Aspiring Product Manager | Creator-Led Growth | User-Centred Design

mishraishita925@gmail.com | LinkedIn

Professional Summary

Product-minded engineering student (B.E. Information Science, CGPA 9.38) who has also built an audience of 50K+ followers with 6M+ monthly views from scratch, which means I understand what users want, what makes them stay, and how to turn insight into action. Experienced in user research, wireframing and prototyping in Figma, performance tracking.

Projects

Blinkit | *Beyond Out-of-Stock: Closest Matches & Compare, PM Case Study*

- Conducted user interviews and app research to understand out-of-stock behaviour and price sensitivity.
- Identified user patterns around app switching, price differences, and waiting for restocks.
- Proposed "Closest Matches" with match-reason labels and a "Compare" view for pack size, total price and unit price, helping shoppers assess alternatives alongside existing options such as "Notify me."
- Defined success metrics including alternative selection rate and checkout conversion, with usability testing as a next step.

Loop | *Messaging App Concept, PM Case Study | Figma, PRD* *Clickable prototype*

- Conceived a messenger that turns "don't forget" messages into two-tap reminders and tasks without leaving the chat; ran it end to end as a self-directed case study covering discovery, PRD, Figma prototype and measurement plan.
- Discovery: defined the core problem (important information gets buried in chats), three personas (student, early-career analyst, family organiser), six jobs-to-be-done, and a feature-level competitive analysis of WhatsApp, Telegram and Slack.
- Scoped the MVP with RICE prioritisation (hypothetical inputs), deliberately cutting events, smart suggestions and AI features; built a Now / Next / Later roadmap with a gate before each horizon.
- Defined the North Star metric (Weekly Actioned Users), the full message-to-action funnel, activation and retention metrics, guardrails (notification opt-outs) and a first experiment (preset vs. blank reminder time).

Experience

Content Creator & Brand Influencer | *Instagram, Independent Creator* *6+ Months*

- Grew an audience to 50K+ followers and 6M+ monthly views, entirely organically, by treating content as a product.
- Tracked reach and engagement metrics to decide what to make more of, refining content strategy based on data rather than guesswork.
- Partnered with brands including Flipkart, Shopsy, Newme, Plum and Veg Beauty, delivering sponsored content against brand briefs and deadlines.

Graphic Designer Intern | *InAmigos Foundation (NGO)* *Internship*

- Designed social media creatives, event graphics and campaign assets to amplify the organisation's mission and reach.

Media Team Member | *ByteXync (College Coding Club)* *5 Months*

- Created posters, banners and digital assets for coding events and workshops, driving visibility and participation; also supported social media design and outreach, helping grow the club's online presence.

Tech Team Member | *OSCode (College Coding Club)* *Present*

- Collaborate with cross-functional teammates on projects, contributing ideas and solutions and executing under deadlines.

Skills

Product: Product discovery, user research, personas, Jobs-to-be-Done, competitive analysis, problem definition, PRD writing, user stories and acceptance criteria, RICE prioritisation, MVP scoping, roadmapping (Now / Next / Later), user journey mapping, edge-case analysis, backlog management, Agile / Scrum, sprint planning, experiment design (A/B testing), go-to-market basics, stakeholder collaboration

Design & Tools: Jira (backlogs, epics, user stories, sprint tracking), Figma (wireframes, prototypes, user flows), Power BI, graphic design, social media creatives, video editing, Excel, Python

Analytics & Metrics: North Star metrics, funnel analysis.

Growth & Marketing: Content strategy, Instagram growth, engagement and reach optimisation, brand collaborations, community building

Soft Skills: Communication, creativity, time management, collaboration, adaptability, self-driven consistency

Education

Dayananda Sagar College of Engineering, Bangalore, Karnataka CGPA: 9.38
Bachelor of Engineering in Information Science

Certifications
